## TASK 1.1 Website

Screenshots of website:

Red Velvet cake	Chocolate Mud Cake
Light and Fluffy	Rich
Red	Chocolate
Smooth texture	Tasty

Here is a fun fact about cakes. The earliest cakes were actually flat and compact discs of grain which were dried and compacted together. Isn't that interesting!!!

A screenshot of a web browser window showing a form titled 'What is your name?:'. The form includes input fields for 'What is your name?:', 'How old are you?', and 'What is your favourite cake?'. Below the 'What is your favourite cake?' field is a dropdown menu with the placeholder text 'Select your cake!'. Further down, there is a section titled 'True or False, to make a chocolate mud cake you need vanilla essence.' with two radio button options: 'True' and 'False'. At the bottom of the form is a text area with the placeholder text 'Any further comments are appreciated!' and a 'Submit' button.

What is your name?:

How old are you?

What is your favourite cake?

Select your cake!

True or False, to make a chocolate mud cake you need vanilla essence.

☐ True

☐ False

Any further comments are appreciated!

Submit

Reflection:

Today I have completed my first HTML Website. This website was themed around cakes!

A HTML page was created and I covered html tags such as <img> <table> <form> <li> <link> <p> <body> <input> and also linked a css page in order to control the formatting aspects of the project. Overall I believe for my first website I did fantastic and am very happy with the results!

Thankyou for the task!
